**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7,9, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Wunsch U.S. Patent No. 4,924,997.

Claim 7, Wunsch teaches a lifting apparatus 64 connected to a transverse crossmember 62; a transverse member 63 supported by said transverse crossmember 62, said transverse member 63 being horizontally fixed; an extension arm 34 disposed on said transverse member 63, said extension arm 34 adapted for traveling horizontally and including a movable slide 70; at least one guide carriage 12 for guiding said extension arm 34 on said crossmember 62; a carrying device 20 for horizontally driving said at least one guide carriage 12 responsive to movement of said extension arm 34; and said at least one guide carriage 12 being connected to a linear guide 56 that is attached to said extension arm 34 and said crossmember 62 Fig. 3.

Claim 9, Wunsch teaches said linear guide 56 is a rolling or sliding guide and is a flat or circular guide (a cam which rotates) C3 L64-68.

Claim 10, Wunsch teaches said linear guide 56 includes first and second guide shoes 44,54; and a holding plate 52 connects said guide shoes 44,54 Fig. 6.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wunsch U.S. Patent No. 4,924,997 in view of Lundberg U.S. Patent No. 6,247,226. Claim 8, Wunsch teaches said carrying device 20, but Lundberg teaches carrying device 11 comprises first and second racks (upper and lower bar of house 5) and a toothed wheel 45; and said second rack (lower bar) being securely joined to said extension arm 5 and said first rack (upper bar) being securely joined to said transverse member 23. It would be obvious to one of ordinary skill to use the carrying device assembly as taught by Lundberg into the invention of Wunsch in order to securely transport the workpiece.

Claim 12, Wunsch teaches said carrying apparatus 20, Lundberg teaches a carrying apparatus 11 is a chain drive or toothed belt drive 43 (part of the assembly). It would be obvious to one of ordinary skill to use the a toothed belt as taught by Lundberg into the invention of Wunsch in order to maintain the position of the belt during transport.

***Allowable Subject Matter***

Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
